

Lighting the Way to Energy Savings

Are you looking for significant energy and cost savings for your facility?

Hoping to see an immediate ROI?

Your solution: Wireless Lighting and Control Systems

Savings can exceed 70% and many customers experience a payback in less than two years.

Questions to Ask Before Buying Any Lighting System

- Is it scalable?
- Is it easy to use?
- Is it easy to make changes?
- Can I integrate with other manufacturers' products?
- Will the system save energy and reduce cost?

Energy Resources, Inc.

We are an authorized dealer for leading lighting and lighting controls manufacturers. For over 15 years, we have installed wireless lighting systems in more than 35 million square feet of space. Daintree controls more than 400M Sq. Ft. In addition, we provide commissioning services to our clients enabling them to maximize their energy efficiency.

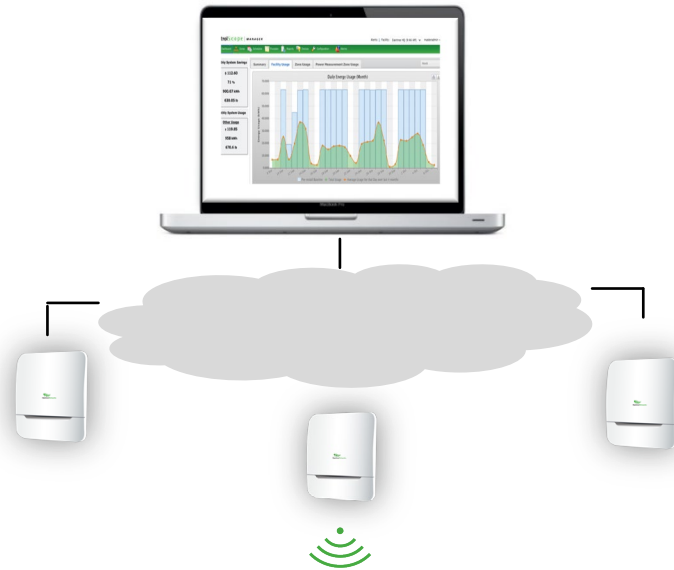

Daintree Networks' ControlScope™

We work with one of the industry's leading intelligent web-based software

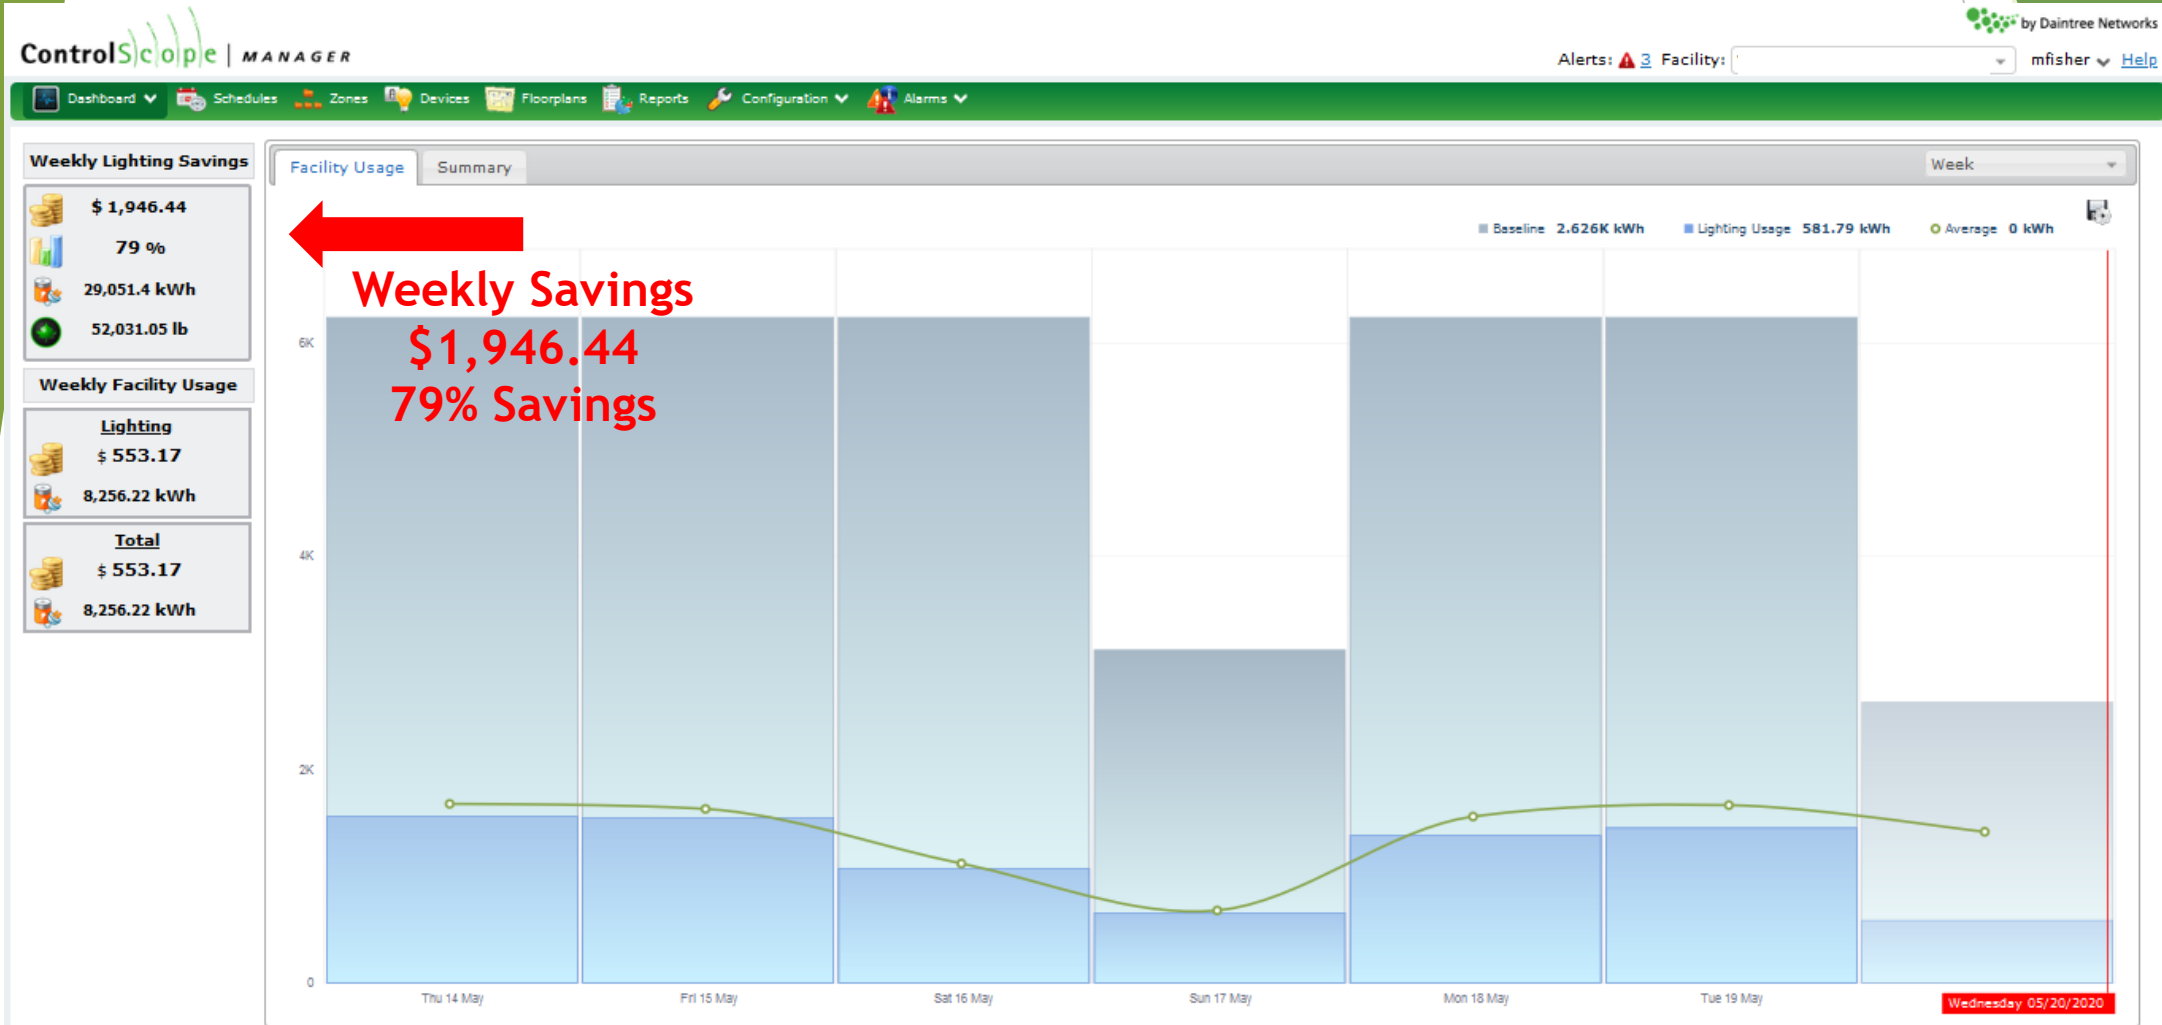

- Comprehensive, advanced control strategies for wireless lighting
- Measures and reports
- Offers significant energy savings
- Manage, maintain and change lighting configurations
- Open, non-proprietary, global technology
- Offers helpful features including scheduling, task tuning, motion sensors, and more
- Local and state energy rebates can help defray your cost

Easy Integration

- Works with any fixture
- Open-Source so the system is not tied to a propriety system and works with any Zigbee device or control
- Easily integrates with any BACnet BAS system
- May be accessed remotely for easy, cost effective management

Easy Reporting Shows Energy Savings and Usage
